GRASS**

MADE FOR LIVING

Why choose artificial grass?

- Minimal maintenance.
- No more mucky kids or pet's paws, traipsing mud through the house.
- A perfect-looking lawn every day of the year regardless of the weather.
- Adds value to any home.
- Makes outdoor spaces usable all year round.

Why is Namgrass so special?

There's nothing artificial about their passion for grass.

- They have been producing artificial grass for 30 years.
- All products come with a 10 year warranty certificate, which can be registered/applied for on the Namgrass website once your purchase is made.
- The Namgrass research and development team are constantly designing and innovating to ensure their grass is as close to the real thing as it gets.
- They have produced in excess of 50 million m² of artificial grass globally.

- **No mowing**
- **No watering**
- **No mud**

FAQs

Does Namgrass require maintenance?

Namgrass say that there is no such thing as zero maintenance, especially in the garden. But Namgrass requires minimal maintenance. See their online guide for more information about aftercare and maintenance.

How long can I expect my Namgrass lawn to last?

The life expectancy of any artificial grass very much depends on its usage. Namgrass say that under a normal domestic/garden usage that the life expectancy of the grass should be between 15 to 20 years.

Will my Namgrass fade or discolour in the sun?

All Namgrass products are fully UV stabilised, and include a 10 year warranty. You should experience no fade with Namgrass products.

Will my pets 'mess' affect Namgrass?

Pet 'mess' will not affect Namgrass, nor will it discolour the grass. Simply remove it as you would on any normal lawn, and hose down occasionally. Their artificial grass cleaner can help too!

Can I have a BBQ on my Namgrass lawn?

All Namgrass products are tested to determine fire behaviour to EN ISO 9239-1 standards. Should you wish to put a BBQ on or near artificial grass we would recommend standing it on hard standing for example, some slabs – just to avoid any damage being done to your grass.
